RE: Annual Report  
Hazardous Waste Generation/Management

The Minnesota Pollution Control Agency's (MPCA) hazardous waste rules require generators of hazardous waste to submit annual reports to the MPCA by March 1. The annual report describes the generation and management of hazardous waste produced by the generator during the previous calendar year.

To assist you we have prepared an annual report form for you to review, update, sign, and return to us. The form was generated through our computerized database and shows the information which we currently have on file. This information came from your original hazardous waste disclosure and subsequent updates. We recognize that some of the information may be out-of-date or incorrect.

Please review your records and the enclosed annual report form. A line should be drawn through any incorrect information and the new or current information should be written on the adjacent line (please use a dark or colored pen).

If you no longer produce a particular waste, there is a space provided for you to tell us when you stopped producing the waste.

If you produce a new waste or a waste which is not on this annual report, fill out management plans (the enclosed green form) for each of those wastes. Each of these green sheets must be dated and signed.

If additional sheets, testing data, or explanatory information is necessary for you to completely describe the characteristics or management of your waste, please provide it. Please make certain however, that all such supplemental sheets clearly identify your company and the particular waste to which that sheet applies.

Page Two

The MPCA hazardous waste rules, which have full force of the law, require all persons to "act in good faith and with complete truthfulness, accuracy, disclosure, and candor" in dealings with the MPCA. Disclosures are submitted under oath. Civil or criminal sanctions are provided for in the event of violations of MPCA rules. By your signature on the annual report you are certifying that the information is complete and accurate. There is space provided for your signature on the first page of this report.

The Minnesota hazardous waste rules were revised in July of 1984 to be consistent with the federal hazardous waste rules. If any of these changes affect the management of your waste we will notify you after we review the annual report. If your disclosure has never been approved, we will use this annual report as a disclosure update on which to base disclosure approval.

Please complete the annual report, sign and date it, sign and date any supplemental green management plans, clearly identify any other information and return the annual report form to:
